

Lab- Protein processing

1. Go to <https://www.syngoportal.org/convert> to convert the protein Ensemble ID to symbol

Input ID: ENSP00000230323, (ID type: Ensembl protein; input species: human)
Search to get the symbol

2. Go to <https://www.rcsb.org/search>

Search by symbol

View file to get the protein sequence.

3. Go to <https://www.rcsb.org/search>
Input the following sequence to search by

“sequence similarity” and “structure similarity”

```
MASGDFCSPGEGMEILQQVCSKQLPPCNLSKEDLLQNPYFSKLLLNLSQLHVDESGLSLTLAKEQAQA  
WKEVRLHKTTWLRSEILHRVIQELLVDYYVKIQDTNVTSEDKKFHETLEQRLLVTELMRLLGPSQEREIP  
PLGLEKADLLELMPLSEDFVWMRRLQQEVEEQLKKKCFTLLCYYPDNSDADSETVKAQVWKLAE  
VLVGEQQQCQDAKSQQKEQMMLLEKKSAAYSQVLLRCLTLLQRLLQEHLKTQSELDRIINAQYLEVK  
CGAMILKLRMEELKILSDTYTVEKVEVHRLIRDRLEGAIHLQEQDMENSRQVLNSYEVLGEEFDRLVKE  
YTVLKQATENKRWALQEFSKVYR
```

Download file for the searched top 3 result for each round

4. Go to <https://www.rcsb.org/3d-view> to visualise protein 3D structure.
Import *.cif or .pdf file to visualise the 3D structure of protein that you get in last step.

5. Go to <https://alphafoldserver.com/>

Input two protein sequence in step 2 and the sequence in step 3, select the type to be protein, then click Botton continue and preview the job. Download the result

6. Get the screenshot of step 3,4,5 and submit your report.
